ExSite[™] Content Management System

Update Announcement

ExSite 3.8.4 Features

UPGRADES

Email Distribution Module

- You can now preview your Recipient Lists to see how many people it includes. It displays the first 100 people.
- French language support for Sender Name field (ie., accepts accents)
- Increased merge code support -- if you create an Event contact list, the Email Distribution Module will give you additional merge codes to use in your email

📔 JGallery

Use the JGallery to showcase your photo galleries or video libraries.

• Image captions can be hotlinks

Content Management

• Publish specific language pages - you can publish a single language instead of all languages at the same time.

Job Postings Module

 Admins can now enter new postings via the control panel in order to bypass the payment process. (Note: only important for those clients that have fee-based job postings)

May

2013

Payment Module

• Admins can export the accounts payable/receivable report

Connex (Advanced Email)

- French language characters are supported in auto responder messages
- Advanced spam filter is now available. This provides adaptive spam filtering. If you receive spam in your Inbox, move it into the Spam folder. The system will learn what you consider to be spam and filter accordingly by placing it in the Spam folder. Contact Exware to see if this feature is available to you.

Coming Next Update

The Exware development team is already working hard toward the next Update.....

New Editor Look & Feel

The Exware CMS uses the industry standard Tiny MCE editor. Tiny MCE has updated the look & feel of the editor to improve ease of use.

Evite Module

Exware is working on a new module that will allow admins to send out html or text-based invitations with Accept and Decline links.

This will allow admins to track accepts, declines, and no responses. Admins will also be able to

resend to all 'no responses'. (NOTE: This module will require set-up cost)

Do you have an enhancement or new request? Tell us at **support.exware.com**
